## EXECUTIVE SUMMARY WITH AREA OF CONCERN ROSTER AND SUMMARIES

T&M Associates (T&M) has completed this environmental site assessment (ESA) for the Site parcel located at 1800 Davis Street, Block 1395, Lot 39, Census Tract 6015 in the Whitman Park neighborhood of the City of Camden, Camden County, New Jersey. The Site contains a 38,782 square foot, 4-story structure built in 1971 situated at the southeast side. The remainder of the Site is utilized as asphalt parking lot. The Site parcel is 1.53 acres in area and is owned by FP Properties 101, LLC. This ESA was conducted on behalf of the Camden Redevelopment Agency (CRA) as part of the pre-acquisition due diligence investigation.

**Operational History:** The Site structure (Ferry Office Building) was constructed in 1971 with operations limited to office space. The historical research indicates that the Site was utilized as vacant, sparsely vegetated land with no apparent operations or improvements from at least the early 1900s to development of the current structure. The research conducted for this ESA has not identified any current or former industrial/manufacturing operations or gasoline filling station operations for the Site. The research has not identified any former or current operations which would be classified as “industrial establishments” subject to the New Jersey Department of Environmental Protection (NJDEP) *Industrial Site Recovery Act* (ISRA).

**Summary of Prior/Current Environmental Assessments, Investigations and Filings:** The Request For Pricing dated April 22, 2016 provided by the CRA stated that the CRA is unaware of any prior environmental investigations for the Site. The research and file reviews conducted for this ESA have not identified or referenced any prior environmental assessments, investigations, incidents or filings for the Site structure or operations with the exception of the 1987 and 1989 Non-Applicability Determinations for the Environmental Cleanup and Responsibility Act (ECRA #N75294 and #N90793) assigned for the proposed sale of the Site. The EDR Radius Map Report acquired for the Site and surrounding area for this ESA does not list or locate the Site on any of the *State or Federal* environmental databases which are searched as part of the government records review required for the EPA *Standards and Practices for All Appropriate Inquiries* (40 CFR Part 312) and ASTM Practice for ESAs (E 1527-13).

**Recognized Environmental Condition Narratives and Recommendations:** We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527 of the property at 1800 Davis Street, Camden, NJ. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *property* except for the following:

## **UNDERGROUND STORAGE TANKS AND ASSOCIATED PIPING**

### **REC-1 Underground storage tanks (USTs)**

The Site is not listed or referenced on the New Jersey Department of Environmental Protection (NJDEP) *Regulated Underground Storage Tank* registration database. The records provided for review by the City of Camden municipal clerk's office did not include any records permits or plans associated with the installation or removal of any USTs for the Site parcel and structures. The current Site owners have indicated that they have no information regarding any current or prior USTs or details regarding utilities at the Site. The Site structure is currently improved with natural gas service routed to natural gas-fired furnaces and hot water heaters located in the roof-top utility room. The ECRA affidavits from 1987 and 1989 completed by the owners indicate "electric" heat for the Site structure.

During the Site visit conducted for this ESA, T&M personnel identified two (2) sets of fill port and vent piping at the concrete sidewalk along the exterior, rear side of the Site structure. The location of the fill ports and vent piping are depicted on the ESA Site Plan (**Figure 3**). In addition, a 20-square foot rectangular concrete vault is situated at the rear of the Site structure (**Photographs #12-15**). T&M did not identify any heating fuel oil UST piping at the interior of the Site structure including the mechanical room at the rear of the structure which housed the natural gas service meter equipment.

***REC-1 Recommendation:** Additional investigation of REC-1 is required in order to confirm or deny the presence of USTs at the Site.*

## **FLOOR DRAINS**

### **REC-2 Floor drains**

T&M identified floor drains at the interior bathrooms of the Site structure. The interior of the Site structure was in dilapidated condition with extensive water damage and building debris covering the majority of the floor surfaces, therefore there may be floor drains located at the interior of the structure which were not identified during the Site visit and are not noted in this ESA. Based on the age of the structure and presence of municipal water service at Davis Street, T&M presumes that the floor drains and all sanitary sewer waste generated at the Site was discharged to the local/community sanitary sewer system, and that no on-Site wastewater collection structures (septic tanks, oil-water separators) are present at the Site. The history of operations for the Site does not include any industrial or manufacturing operations.

***REC-2 Recommendation:** No additional investigation of REC-2 is recommended based on the absence of any former or current industrial wastewater generation for the Site.*

## **POSSIBLE HISTORIC FILL OR ANY OTHER FILL MATERIAL**

### **REC-3 Fill material**

According to the NJDEP Division of Water Supply and Geoscience, most urban and suburban areas of New Jersey are underlain by a discontinuous layer of excavated indigenous soil mixed with varying amounts of non-indigenous fill material. The NJDEP GeoWeb environmental database program and the NJDEP *Historic Fill of the Camden, NJ Quadrangle* (Map HFM-103) do not depict any mapped “Historic Fill” or fill areas at the Site.

However, based on the review of historic aerial photographs depicting irregular surface features, surface disturbance and cleared areas at the Site, it is possible that the Site is underlain by a layer of non-indigenous fill material placed prior to development of the Site during the 1970s. Further, T&M’s review of the NJDEP’s GeoWeb program has identified unmapped, *historic fill* contaminated sites with similar development histories approximately 500 feet to the northeast of the Site and to the south of the Site.

*REC-3 Recommendation: Additional investigation for the presence of contaminated historic fill material at the Site is recommended.*

## **ELECTRICAL TRANSFORMERS & CAPACITORS**

### **REC-4 Transformers**

T&M identified interior, dry-type transformers at the electrical utility rooms at each floor of the structure (**Photograph #16**). Dry-type transformers do not contain any liquid insulating fluid and are not considered to be a possible PCB source.

*REC-4 Conclusion and Recommendation: No additional investigation of REC-4 is recommended based on the absence of any transformers with liquid insulation media.*

## **HYDRAULIC LIFTS FOR ELEVATORS**

### **REC-5 Elevator**

One hydraulic elevator is situated at the central area of the Site structure. The elevator control room with control apparatus is located on the ground floor (**Photographs #10 & 17, 18**). Due to the absence of electrical power at the Site structure and the observed condition of the elevator control apparatus, T&M was not provided access for inspection to determine whether or not there is a below grade elevator pit with possible hydraulic shaft, piping and sumps or drains. The absence of access to any the elevator shaft is a *limiting condition* and *significant data gap* with respect to the Site visit activity which may have prevented the identification of RECs at the

elevator shaft such as areas of staining and/or sumps and floor drains.

*REC-5 Recommendation: T&M recommends additional investigation and assessment of the elevator and elevator shaft including sampling and laboratory analysis of hydraulic fluid as well as soil and groundwater media below and adjacent to the elevator shaft.*

*End of Executive Summary*

## 1.0 INTRODUCTION

### 1.1 Purpose and Scope

T&M has completed this ESA for the Site parcel in accordance with the ASTM Designation: E 1527-13 for Phase I Environmental Site Assessments (Phase I) including the USEPA “All Appropriate Inquiry” (AAI) Rule as required by the USEPA Brownfields Assessment Grant protocols.

**Recognized Environmental Conditions** are defined at ASTM E 1527-13, Section 1.1.1 as “...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a Property; (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” The ASTM Standard does not require that the ESA present recommendations for additional Phase II Site Investigation activities for the RECs identified in the ESA.

### 1.2 Data gap analysis

Per Section 12.7 of E1527-13, the ESA report “shall identify and comment on significant data gaps that affect the ability of the Environmental Professional (EP) to identify RECs. No significant data gaps affecting the ability of the EP to identify RECs were experienced or encountered during the research and preparation of this ESA with the exception of the absence of access to the below grade elevator pit referenced at **REC-5** at the **Executive Summary** of this ESA.

### 1.3 Limitations and Exceptions of Assessment

The scope of work for this ESA included file reviews and interviews, historical research, database reviews and searches, and a visual reconnaissance of the Site in order to ascertain and identify RECs and final completion of the ESA Report. The scope of services did not include the acquisition of soil, groundwater, surface water or air samples for the purpose of evaluating the potential impairment or contamination of the Site. The scope of services for this ESA did not include the sampling and/or evaluation of the Site and/or the structures or areas on the Site for the potential presence of asbestos, lead-based paint, or wetlands.

### 1.4 Environmental Professional Statement

As required at ASTM E-1527-13, Section 12.13 *Environmental Professional Statement*, I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 40 CFR 312 and that I have the specific qualifications based on education, training, and experience to assess a *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

T&M Job No. CMRA00010 AUGUST 2016

Joseph S. Martin, CHMM  
Principal Environmental Scientist  
T&M Associates

## 2.0 SITE DESCRIPTION

### 2.1 Site Location and Description

The Site which is the subject of this ESA is the parcel located at 1800 Davis Street, Block 1395, Lot 39, Census Tract 6015 in the Whitman Park neighborhood of the City of Camden, Camden County, New Jersey. The Site contains a 38,782 square foot, 4-story structure built in 1971 situated at the southeast side. The remainder of the Site is utilized as asphalt parking lot. The Site parcel is 1.53 acres in area and is owned by FP Properties 101, LLC. The Site is located in a Transit Oriented Development Zone and is bordered to the north, northeast and southeast by the Ferry Avenue PATCO parking lots. An electrical substation is located adjacent to the northeast side of the Site and the PATCO High Speed rail line is located approximately 300 feet to the northeast of the Site.

The position of the Site is Latitude 39.9225470" North, Longitude 75.0940090 West, and Easting 325,533.9, Northing 397,257.3. The property parcel information acquired from the City of Camden municipal tax assessor indicates that the Property Class designation for the Site is Class 4A – Commercial.

### 2.2 Physical Setting

#### 2.2.1 Topography

The topography of the Site is flat and even with no bluffs, depressions or ravines in conformance with the adjoining thoroughfares and lands to the north, south, east and west. The Camden, NJ quadrangle maps (**Figure 1**) depict a surface elevation contour interval of 20 feet above mean sea level (msl) at the Site location.

#### 2.2.2 Geology and Soils

Physiographic Province: The NJDEP Geoweb program depicts the Site within the southwest portion of the Coastal Plain of New Jersey.

Surficial Geology: The Soil Survey of Camden County depicts the Site as situated with an Urban land soil area. The *Surficial Geology* theme of the GeoWeb program depicts the *Lower Colluvium Formation* (Qcl) surficial geology formation for the Site and lands to the east and west.

Soils: The United States Department of Agriculture (USDA) Web Soil Survey (WSS) (<http://websoilsurvey.nrcs.usda.gov>) depicts the *Urban land* (UR) soil type at the Site. Urban land is characterized by surfaces covered by pavement, concrete, buildings, and other structures underlain by disturbed and natural soil material.

NJDEP State Fill Areas: The NJDEP Division of Water Supply and GeoScience has mapped *historic state fill areas* on the Camden, NJ quadrangle. No *State fill areas* are mapped at the Site on the NJDEP program mapping.

Bedrock Geology: The *Bedrock Geology* theme of the GeoWeb program depicts the Site as situated within the *Magothy Formation* (Kmg) with lithology consisting of quartz sand, fine- to coarse grained, interbedded with thin-bedded clay or clay-silt.

Hydrology/Groundwater: According to the New Jersey Register (24 N.J.R. 201) groundwater in the vicinity of the Site is potentially classified as Class II-A. Class II-A is designated as potable water uses and conversion (through conventional treatment, mixing or other similar technique) to potable water. Local groundwater occurs within the unconsolidated overburden deposits. Topographically influenced groundwater flow is typical, as shallow groundwater tends to originate in areas of topographic highs and flow towards areas of topographic lows.

Aquifers: An aquifer is described as an underground layer of water-bearing permeable rock or unconsolidated materials. The GeoWeb program does not indicate any surficial aquifer for the Site area. The GeoWeb program does indicate the Site as situated within the *Potomac-Raritan-Magothy aquifer* (prma) bedrock aquifer system area.

### **2.2.3 Surface Water and Wetlands**

The topographic maps, aerial photographs and NJDEP GeoWeb program do not depict any current or historic/former surface water courses or surface water bodies at the Site. The GeoWeb program does not depict any wetland areas at the Site. The nearest surface water body to the Site is a Lake/Pond associated with the Cooper River Lake situated approximately 1,300 feet to the northeast.

### **2.3 Land Uses at Site and Site Vicinity**

The 2012 Land Use theme presented on the NJDEP GeoWeb program depicts the General Land Use at the Site as *Urban*, with the specific land use as *Commercial Services*. Land uses to the north, south and east are listed as *Railroads*, and land uses to the west are listed as *Residential, High Density or Multiple Dwelling*.

The research conducted for this ESA has not identified any current or former industrial manufacturing operations that might be subject to the Industrial Site Recovery Act (ISRA) or gasoline filling station operations for the Site.

### 3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by the *User* of this ESA (in this case the CRA) via the file reviews and interviews conducted in accordance with the ASTM E1527-13 ESA procedure. The Request For Pricing dated April 22, 2016 provided by the CRA stated that the CRA is unaware of any prior environmental investigations for the Site. The reviews of the NJDEP GeoWeb contaminated soil *Deed Notice* and contaminated groundwater *Classification Exception Area* (CEA) database themes conducted for this ESA did not identify any environmental liens or activity and use limitations for the Site parcels.

- **Environmental liens that are filed or recorded against the property (40 CFR 312.25).**

Did a search of recorded land title records (or judicial records where appropriate, identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

USER REPLY: No.

- **Activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and vi)).**

Did a search of *recorded land title records* (or judicial records where appropriate) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

USER REPLY: No.

- **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

USER REPLY: No and/or Not Applicable.

- **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

USER REPLY: *No and/or Not Applicable.*

- **Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).**

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the *property*?

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

USER REPLY: *(a.) The past uses of the Property are known; No to (b.), (c.) and (d.).*

- **The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*?

USER REPLY: *No.*

### **3.1 Reason for Performing the Environmental Site Assessment**

T&M is conducting this ESA on behalf of the purchaser (City of Camden). The purpose of this ESA is identify potentially contaminated RECs at the Site in accordance with the ASTM Designation: E 1527-13 for Phase I Environmental Site Assessments (Phase I) including the USEPA "All Appropriate Inquiry" (AAI) Rule. This ESA was conducted on behalf of the CMRA as part of the pre-acquisition environmental due diligence investigation.

## 4.0 OWNERSHIP AND OPERATIONAL HISTORY

### 4.1 Ownership Records

The ESA procedure requires the identification and presentation of the history of ownership and all obvious uses and operations at the Site from the present back to the Site's first developed use or back to 1940, whichever is earlier. The Camden Tax Assessor provided the following ownership information for the Site.

| Name of Property Owner | Type of operation | From          | To            |
|------------------------|-------------------|---------------|---------------|
| FP Properties 101, LLC | Office Building   | 1/12/2016     | Present       |
| Ferry Plaza SME, Inc.  | Office Building   | Prior to 1991 | 1/12/2016     |
| Ferry Realty Assoc.    | Office building   | Prior to 1989 | Prior to 1991 |
| Frederick DiMarco      | Office Building   | Prior to 1987 | Prior to 1989 |

### 4.2 Historical and Current Site Operations

**Operational History:** The Site structure (Ferry Office Building) was constructed in 1971 with operations limited to office space. The historical research indicates that the Site was utilized as vacant, sparsely vegetated land with no apparent operations or improvements from at least the early 1900s to development of the current structure.

The research conducted for this ESA has not identified any current or former industrial/manufacturing operations or gasoline filling station operations for the Site. The research has not identified any former or current operations which would be classified as "industrial establishments" subject to the New Jersey Department of Environmental Protection (NJDEP) *Industrial Site Recovery Act* (ISRA).

### 4.3 Hazardous Material and Substance Inventory

The research conducted for this ESA has not identified any historic or current industrial, manufacturing or disposal operations for the Site. Site operations have been limited to an office building and parking lot. This ESA has identified potential heating fuel oil USTs at the Site, therefore the hazardous material and substance inventory appears to be limited to heating fuel oil.

| Material Name    | CAS # if known | Typical annual usage (gallons/lbs.) | Storage method (i.e. drum, tank, jars) |
|------------------|----------------|-------------------------------------|--|
| Heating fuel oil | 68476-30-2     | Unknown                             | UST                                    |

#### 4.4 Current and Historic Wastewater Discharge Summary

The research conducted for this ESA has not identified any historic/former industrial and manufacturing operations that might have indicated industrial or other wastewater discharges. Wastewater discharges appear to have been limited to sanitary waste generated at the current office building structure.

| Discharge Period |         | Discharge Type | Discharge Location          |
|------------------|---------|----------------|-----------------------------|
| From             | To      |                |                             |
| 1974             | Present | Sanitary       | Local sanitary sewer system |

#### 4.5 Current and Historic Process Water Streams and Disposal Points

The research conducted for this ESA has not identified any historic/former industrial and manufacturing operations for the Site that might have indicated industrial or manufacturing/process operations and resulting process waste streams.

#### 4.6 Radioactive Materials

The research and file reviews conducted for this ESA has not identified any current or historic sources of man-made or *technologically enhanced naturally-occurring* (Tenorm) radioactive materials for the Site.

#### 4.7 Discharge History of Hazardous Substances and Wastes

The research conducted for this ESA has not identified any historic discharges of hazardous substances or wastes for the Site.

#### 4.8 Current and Historic Remediation Activities

The research and file reviews conducted for this ESA have not identified any historic remediation activities for the Site.

#### 4.9 Protectiveness of Past Remedies

The research and file reviews conducted for this ESA have not identified any current or historic past remedies, engineering or institutional controls, NJDEP No Further Action (NFA) approvals or Licensed Site Remediation Professional (LSRP) Response Action Outcome (RAO) approvals for the Site.

#### **4.10 Order of Magnitude Analysis, NJAC 7:26E, 3.2(a)5**

The research and file reviews conducted for this ESA have not identified any current or historic past remedies, engineering or institutional controls, NFA or RAO approvals for the Site. Therefore there is no Order of Magnitude Analysis required.

#### **4.11 Historical Data on Environmental Quality at Site**

The research and file reviews conducted for this ESA have not identified any historical data on environmental quality (sampling data) for the Site.

#### **4.12 Roster of Federal, State and Local Environmental Permits**

The research and file reviews conducted for this ESA have not identified any current or federal, state or local environmental permits for the Site.

#### **4.13 Summary of Enforcement Actions**

The research and file reviews conducted for this ESA has not identified any current or historic enforcement actions for the Site.

## 5.0 HISTORIC MATERIAL REVIEW

### 5.1 Topographic Map Review

Current and historic topographic maps were reviewed for information regarding past uses of the Site. Copies of the 1920, 1973 and 2014 topographic maps are presented as **Figure 1**.

#### **1894 through 1898 Philadelphia, PA Topographic Maps**

##### **1920 Camden, NJ Topographic Map (Figure 1)**

#### **1943 through 1967 Camden, NJ Topographic Maps**

The topographic maps for 1894 through 1967 depict the Site location as vacant land with no structures. No adjoining roads or developments are depicted.

##### **1973 Camden, NJ Topographic Map (Figure 1)**

#### **1984 through 1995 Camden, NJ Topographic Maps**

The topographic maps for 1973 through 1995 depict the Site location with the current structure bordered to the south by Station Drive and to the west by Davis Street.

##### **2014 Camden, NJ Topographic Map (Figure 1)**

The 2014 topographic map depicts the Site location bordered to the south by Station Drive and to the west by Davis Street. Individual structures are not depicted on the 2014 topographic maps.

### 5.2 Tax Map Review

The Site parcel is depicted on the portion of the Camden City Tax Map Sheet No. 21.21 presented as **Figure 2**. The tax map depicts the parcel lot and block designations and parcel dimensions. No easements or other notations are depicted on the tax map for the Site.

### 5.3 Sanborn Map Review

Sanborn Fire Insurance Maps depicting the Site from 1906 through 1994 were acquired for use in this ESA.

#### **1906 Sanborn Map**

##### **1950 Sanborn Map (Figure 4)**

The Sanborn Maps for 1906 and 1950 depict the Site location as an undivided portion of a greater vacant land area which extends to the north, south, east and west.

**1982 Sanborn Map (Figure 5)**

**1994 Sanborn Map**

The Sanborn Maps for 1982 and 1994 depict the Site location with the current structure to the east of Davis Street and to the northwest of a parking lot. The transformer yard is depicted to the east of the Site.

**5.4 Aerial Photographs**

Aerial photographs for 1931 through 2013 depicting the Site were reviewed in order to ascertain the history of uses and operations for the Site and adjoining lands. Summaries of the aerial review are below and copies of certain aerial photographs are presented as **Figures** as indicated.

**1930 Aerial Photograph (Figure 6)**

**1940 Aerial Photograph (Figure 7)**

**1951 Aerial Photograph**

**1956 Aerial Photograph**

**1963 Aerial Photograph**

The aerial photographs for 1931 through 1963 depict the Site as an undivided part of a greater vegetated, wooded and partially cleared area which extends to the south and west. Cleared ways or survey cut lines are evident along the northeast and northwest sides of the Site on the 1931 and 1940 aerials. No structures are depicted at the Site. To the north, south, east and west is wooded and vegetated land with no structures.

**1965 Aerial Photograph (Figure 8)**

**1967 Aerial Photograph**

The aerial photographs for 1965 and 1967 depict the central and south portions of the Site as an undivided part of a greater vegetated, wooded and partially cleared area which extends to the south and west. The north portion of the Site is depicted as part of a cleared meadow which extends to the west and northwest. No structures are depicted at the Site. To the north, south and east is wooded and vegetated land with no structures. To the west is cleared meadow.

**1970 Aerial Photograph**

The aerial photograph for 1970 depicts the majority of the Site as vegetated, wooded land. The north and south edges are depicted as cleared land. No structures are depicted at the Site. To the north and northeast is paved parking lot; to the south is Station Drive with parking lot beyond; to the east is parking lot; and to the west is Davis Street with cleared land beyond.

**1971 Aerial Photograph (Figure 9)**

The aerial photograph for 1971 depicts the Site with the current structure at the southeast side. The remainder of the Site is depicted as cleared disturbed land. To the north and northeast is paved parking lot; to the south is Station Drive with parking lot beyond; to the east is parking lot; and to the west is Davis Street with cleared land beyond.

**1974 Aerial Photograph**

**1981 Aerial Photograph (Figure 10)**

**1995 Aerial Photograph**

**2002 Aerial Photograph**

**2007 Aerial Photograph (Figure 11)**

**2012 Aerial Photograph (Figure 12)**

**2013 Aerial Photograph**

The aerial photographs for 1974 through 2013 depict the Site with the current structure at the southeast side. The remainder of the Site is depicted as paved parking lot. To the north and northeast is paved parking lot; to the south is Station Drive with parking lot beyond; to the east is parking lot; and to the west is Davis Street with cleared land beyond.

**5.5 City Directory Report**

The City Directory acquired for this ESA presents listings for the range of street addresses including the Site address for the years 1922 through 2013. The operational or tenant listings for the Site address do not include any industrial or manufacturing operations.

2013 – Termpapers

1990 – Catholic Social Service Refugee Resettlement

1984 – Consumer Pirnie Utilities Service, Inc.

Malcolm Pirnie, Inc.

1980 – Equinox, Inc.

## 6.0 REGULATORY RECORD REVIEWS

### 6.1 Regulatory Agency Records

#### 6.1.1 Camden City Municipal Records

T&M submitted a formal Open Public Records Act (OPRA) request for review of municipal files to the Camden City Custodian's office on July 14, 2016. The request and follow up telephone conversations with the City Clerk's office specified review of all Tax Assessors property record cards, Deeds, Surveys, Code Enforcement/Building Department files, construction, engineering and environmental commission surveys, plans and reporting for the current and former improvements at the Site. A summary of files and material provided by the City is summarized as follows:

- May 17, 1990 – City of Camden Division of License and Inspections Inspection Request for Zoning and Building Codes inspection of premises used by Spectra Specialized Travel, Inc. at Room 201 of the Site structure. The form indicates that the inspection passed and was in conformance with zoning;
- September 16, 1991 – Business Lease between Site Landlord (Ferry Plaza) and Hahnemann University for Suite 301, approximately 4,075 square feet. Use of space is listed as clinical, medical research, outpatient medical services and related office and administrative space;
- July 21, 1993 – Division of Planning Certification indicating that the Site spaces would be used for the operation of an outpatient drug treatment clinic;
- April 13, 1995 – Division of Planning Zoning Permit issued to Hahnemann University for the operation of outpatient services and counseling at Suite 301. Work includes new partitions, carpet and other finishing at existing office spaces;
- April 7, 2014 – City of Camden Notice of Unsafe Structure violation notice issued to Ferry Plaza SME, Inc. as the owner. The Notice orders the demolition of the structure or correction of unsafe conditions;
- April 7, 2014 – City of Camden Emergency Board-Up Memo for the City Construction Official authorizing emergency measures.

*End of municipal file review summary*

#### 6.1.2 Camden County Records

T&M submitted a formal OPRA request for file review to the Camden County Custodian of Records on July 14, 2016. The request and follow up telephone interviews specified review of all septic/well systems, Complaints, Inspections, violations for the Site which may be maintained by

the County offices. The formal reply received from the County Custodian of Records stated that no files or responsive documents for the Site were found by the County Health Department and Office of Environmental Affairs.

*End of county file review summary*

### **6.1.3 NJDEP Database Reviews**

New Jersey State Geographic Information System (NJGIS), GeoWeb and DataMiner Databases  
The NJGIS, GeoWeb and DataMiner database access programs reviewed for this ESA do not list the Site parcel address, Owner name of Ferry Plaza place name on any of the NJDEP regulatory environmental program databases, and no current or former spill, discharge or remediation cases or incidents are referenced for the Site.

T&M submitted formal OPRA file review request for the Site parcel address and parcel designation to the NJDEP Office of Records Access (ORA) on July 15, 2016 under Tracking No. 192316. The summary of files and records provided by ORA is as follows:

- December 23, 1987 – Non-applicability Affidavit prepared by owner of Site (DiMarco) for submittal to the NJDEP ECRA section;
- December 30, 1987 – Letter from NJDEP indicating that the sale of the Site is not subject to the provisions of ECRA based on the absence of any industrial establishment at the Site, ECRA Case #N75294;
- February 22, 1989 – Non-applicability Affidavit prepared by owner of Site (Ferry Realty Assoc) for submittal to the NJDEP ECRA section;
- March 1, 1989 – Letter from NJDEP to Ferry Realty Assoc. indicating that the sale of the Site is not subject to the provisions of ECRA based on the absence of any industrial establishment at the Site. ECRA Case #N90793;

**NJDEP Water Supply Program well search and file reviews:** The Block and Lot Well Search Report produced for the Site parcel information has indicated that there are no water supply, monitoring or irrigation wells listed for the Site parcel.

*End of NJDEP Database Review Summary*

### **6.1.4 USEPA Records**

The USEPA's online searchable databases including the RCRAInfo website and the MyPropertyInfo website were reviewed by T&M for this ESA. The RCRAInfo and MyProperty

databases do not list the Site Parcel addresses or locations on any environmental regulatory or contaminated/remediation lists or databases.

## **6.2 EDR Radius Map™ Report**

A Radius Map™ Report for the Site location was obtained from Environmental Data Resources, Inc. (EDR) for this PA. A copy of a portion of the report is provided in **Appendix 3**. The EDR report presents a review and plot of available government regulatory environmental database facilities for the Site location and adjoining properties located within the radii distances required at the ASTM Phase I Standard. The Site parcel address and location are not listed on any of the NJDEP or USEPA environmental regulatory databases presented in the EDR Report.

## **6.3 Vapor Intrusion and Vapor Encroachment**

On June 14, 2010, ASTM published E 2600-10, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The goal of conducting a vapor encroachment screening (VES) at a parcel of property is to identify a *vapor encroachment condition* (VEC) which is the presence or likely presence of contaminant of concern (COC) vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property. Due to the absence of any reported/documented on-Site or nearby off-Site soil or groundwater contamination cases, there does not appear to be any current potential vapor intrusion or vapor encroachment condition with respect to the Site. Investigation of the possible USTs identified as REC-1 may indicate potential VECs for the Site structure.

## **6.4 Other Sources of Information**

### **6.4.1 Property Liens and Limitations**

The research, file reviews and owner statements conducted and reviewed for this ESA do not indicate or list any Property Liens, Use Limitations or engineering/institutional controls such as Deed Notices (for soil) or Classification Exception Areas (for groundwater) for the Site.

## **7.0 OWNER PROVIDED INFORMATION**

### **7.1 Property Owner Questionnaire**

T&M submitted a formal Property Owner Questionnaire to the current owners of record listed as PT Properties 101, LLC. A representative for the Owner of the Site stated in a message to T&M that the Site was acquired via a tax lien foreclosure sale, and that the current owner never operated the structure, has conducted no surveys, assessments or improvements to the Site and has no information regarding potentially contaminated RECs such as USTs or utility systems at the Site.

## 8.0 SITE RECONNAISSANCE

The Site reconnaissance visit was performed by Joseph S. Martin of T&M on August 3, 2016. The purpose of the site reconnaissance visit was to identify potentially contaminated RECs for the Site.

T&M was not provided access to the space below the elevator car for inspection to determine whether or not there is a below grade elevator pit with possible hydraulic shaft, piping and sumps or drains. The absence of access to any the elevator pit is a *limiting condition* and *significant data gap* with respect to the Site visit activity which may have prevented the identification of RECs at the elevator pit such as areas of staining and/or sumps and floor drains. See discussion of this limiting condition as a *data gap* at **Section 1.2** and **REC-5** of the **Executive Summary**.

The current uses and operations at the Site and the surrounding properties were documented and photographed. Site photographs are presented at **Appendix 2**. Site features are depicted on **Figure 3 –Site Plan With Recognized Environmental Conditions**.

## 9.0 FINDINGS, OPINION AND CONCLUSIONS FOR RECS

The roster of RECs identified at the Site with the environmental professional's *opinion* and *conclusions* of the impact on the Site of the REC conditions is presented as follows. Narratives and recommendations for additional investigation are presented at the **Executive Summary** of this ESA.

We have performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527 of the property at 1800 Davis Street, Camden, NJ. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this ESA. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *property* except for the following:

### **UNDERGROUND STORAGE TANKS AND ASSOCIATED PIPING**

- **REC-1 Underground storage tanks (USTs)**

T&M's opinion is that the presence of dormant/out-of-use USTs at the Site may have an impact on the Site, and our conclusion is that additional investigation is required.

### **FLOOR DRAINS**

- **REC-2 Floor drains**

T&M's opinion is that the presence of floor drains at the interior of the Site structure would not have an impact on the Site due to the absence of any prior or current industrial or manufacturing operations, and our conclusion is that additional investigation is not required.

### **POSSIBLE HISTORIC FILL OR ANY OTHER FILL MATERIAL**

- **REC-3 Fill material**

T&M's opinion is that the presence of fill material at the Site would have an impact on the Site, and our conclusion is that additional investigation is required.

### **ELECTRICAL TRANSFORMERS & CAPACITORS**

- **REC-4 Transformers**

T&M's opinion is that the presence of dry-type transformers at the interior of the Site structure would not have an impact on the Site, and our conclusion is that additional investigation is not required.

### **HYDRAULIC LIFTS FOR ELEVATORS**

- **REC-5 Elevator**

T&M's opinion is that the presence of a hydraulic elevator at the Site may have an impact on the Site, and our conclusion is that additional investigation is required.

*End of Findings, Opinions and Conclusions*

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

### ***Federal Delisted NPL site list***

Delisted NPL..... National Priority List Deletions

### ***Federal CERCLIS list***

FEDERAL FACILITY..... Federal Facility Site Information listing

### ***Federal RCRA CORRACTS facilities list***

CORRACTS..... Corrective Action Report

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

### ***Federal RCRA generators list***

RCRA-LQG..... RCRA - Large Quantity Generators

### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System  
US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROL..... Sites with Institutional Controls

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***State- and tribal - equivalent CERCLIS***

NJ HWS RE-EVAL..... Site Re-Evaluation Report

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

#### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1

## EXECUTIVE SUMMARY

RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

### **State and tribal leaking storage tank lists**

NJ LUST: A listing of regulated Underground Storage Tanks that have a cleanup underway.

A review of the NJ LUST list, as provided by EDR, and dated 02/23/2016 has revealed that there are 6 NJ LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal registered storage tank lists***

NJ UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Protection & Energy's UST Data.

A review of the NJ UST list, as provided by EDR, and dated 02/25/2016 has revealed that there are 13 NJ UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal institutional control / engineering control registries***

NJ ENG CONTROLS: Legal Document that restricts the use of contaminated property; holds owner(s) to the regulatory/statutory requirements for cleanup.

A review of the NJ ENG CONTROLS list, as provided by EDR, and dated 03/14/2016 has revealed that there are 3 NJ ENG CONTROLS sites within approximately 0.5 miles of the target property.

### ***State and tribal voluntary cleanup sites***

NJ VCP: Through the VCP, responsible parties, developers, local officials, or individuals may work with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment.

A review of the NJ VCP list, as provided by EDR, and dated 04/06/2016 has revealed that there are 9 NJ VCP sites within approximately 0.5 miles of the target property.

### **State and tribal Brownfields sites**

NJ BROWNFIELDS: Brownfields are identified as former or current commercial or industrial use sites that are presently vacant or underutilized, on which there is suspected to have been a discharge of a contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria.

A review of the NJ BROWNFIELDS list, as provided by EDR, and dated 01/28/2016 has revealed that there are 8 NJ BROWNFIELDS sites within approximately 0.5 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/21/2016 has revealed that there

## EXECUTIVE SUMMARY

are 4 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 03/23/2016 has revealed that there are 7 NJ ISRA sites within approximately 0.5 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Site name: NEW JERSEY RIVET COMPANY  
Classification: Large Quantity Generator

Date form received by agency: 08/18/1980  
Site name: NEW JERSEY RIVET CO  
Classification: Small Quantity Generator

. Waste code: D001  
. Waste name: IGNITABLE WASTE

. Waste code: F006  
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Facility Has Received Notices of Violations:

Regulation violated: Not reported  
Area of violation: Generators - General  
Date violation determined: 09/25/1992

| Version Date:        | 2014               |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

|                               |  |
|-------------------------------|--|
| <u>Target Property County</u> | FEMA Flood<br><u>Electronic Data</u>           |
| CAMDEN, NJ                    | YES - refer to the Overview Map and Detail Map |

Flood Plain Panel at Target Property: 34007C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

## NATIONAL WETLAND INVENTORY

|                                    |  |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | NWI Electronic<br><u>Data Coverage</u>         |
| CAMDEN                             | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

|                             |   |
|-----------------------------|---|
| Search Radius:              | 1.25 miles  |
| Location Relative to TP:    | 1 - 2 Miles NNW   |
| Site Name:                  | Monsanto Co.  |
| Site EPA ID Number:         | NJD001700830  |
| Groundwater Flow Direction: | Southwest   |
| Inferred Depth to Water:    | 6 feet.   |
| Hydraulic Connection:       | The site borders the outcrop of the Potomac-Raritan-Magothy (PRM) Formation aquifers. The PRM contains leaking confining units where there is a chance of hydraulic connections between aquifers. |
| Sole Source Aquifer:        | No information about a sole source aquifer is available   |
| Data Quality:               | Information is inferred in the CERCLIS investigation report(s)  |

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION</u><br><u>FROM TP</u> | <u>GENERAL DIRECTION</u><br><u>GROUNDWATER FLOW</u> |
|---------------|-----------------------------------|---|
| Not Reported  |                                   |   |

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

|         |   |
|---------|---|
| Era:    | Mesozoic  |
| System: | Cretaceous  |
| Series: | Upper Cretaceous                                      |
| Code:   | uK <i>(decoded above as Era, System &amp; Series)</i> |

#### **GEOLOGIC AGE IDENTIFICATION**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:  
Hydrologic Group: Not reported

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetlands Inventory

Source: Department of Environmental Protection

Telephone: 609-984-2243

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New Jersey Public-Community Water-Supply Wells

Source: Department of Environmental Protection, Geological Survey

Telephone: 609-984-6587

#### New Jersey Monitoring Wells

Source: Department of Environmental Quality

Telephone: 609-984-6587

Ambient Groundwater Quality of the New Jersey Part of the Newark Basin. Natural groundwater quality in the Newark Basin summarize natural groundwater quality in sedimentary bedrock formations of the Newark basin part of the Piedmont physiographic province of New Jersey.

## OTHER STATE DATABASE INFORMATION

### RADON

#### State Database: NJ Radon

Source: Department of Environmental Protection

Telephone: 609-984-5425

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

| <u>Year</u> | <u>Source</u>                        | <u>TP</u> | <u>Adjoining</u> | <u>Text Abstract</u> | <u>Source Image</u> |

Date Of Inspection: 4/6/2014

Date Of This Notice: 4/7/2014

## ACTION

Take **NOTICE** that as a result of the inspections conducted by this agency on 4/6/2014 on the above property, an unsafe condition has been found to exist pursuant to N.J.S.A. 52:27D-132 and N.J.A.C. 5:23-2.32. The building or structure, or portion thereof, deemed an unsafe condition is described as follows:

**UNSAFE STRUCTURE. POLICE EMERGENCY BOARD UP.**

You are hereby **ORDERED** to:

- Vacate the above structure by
- Demolish the above structure by 4/7/2014, or correct the above noted unsafe conditions by no later than 4/7/2014.

Failure to correct the unsafe condition or refusal to comply with this **ORDER** will result in this matter being forwarded to legal counsel for prosecution and assessment of penalties up to \$2,000.00 per week per violation. You must immediately declare to the Construction Official, your acceptance or rejection of the terms of this **ORDER**.

Any building or structure vacated pursuant to this **ORDER** shall not be reoccupied unless and until a certificate of occupancy is issued by the Construction Official.

If you wish to contest this **ORDER**, you may request a hearing before the Construction Board of Appeals of the CCCBOA c/o County Counsel (JAF/DB) within 15 business days of receipt of this notice as provided by N.J.A.C. 5:23A-2.1. The Application to the Construction Board of Appeals may be used for this purpose.

Your application for appeal must be in writing, setting forth your name and address, the address of the building or site in question, the specific sections of the Uniform Construction Code in question and the extent and nature of your reliance on them. You may include a brief statement setting forth your position and nature of the relief sought by you, and you may also append any documents that you consider useful.

The fee for an appeal is \$50.00 and should be forwarded with your application to the Construction Board of Appeals Office at:  
**14TH FL- City Hall Camden NJ 08101**

If you have any questions concerning this matter, please call: 856 7577032

DEPARTMENT OF CODE ENFORCEMENT

BUILDING BUREAU

**EMERGENCY BOARD-UP MEMO**

To: Patrick Keating, Director of Department of Public Works  
From: JAMES R RIZZO, Construction Official  
Date: Monday, April 07, 2014  
SITE: 1800 DAVIS ST  
Owner FERRY PLAZA S M C INC

Pursuant to NJAC 5:23-2.32, I have determined that this structure is unsafe and that emergency measures must be taken in order to avoid a hazard to human life. I therefore request that you proceed immediately to secure the building by boarding all doors and windows providing access. Please notify me once this has been done and provide a statement of costs to this office and to the municipal attorney.

Please proceed first to clean out this property (both interior and exterior) then board up front and back doors and windows.

Signed: \_\_\_\_\_

**Contact E-Mail:** mdreher@tandmassociates.com

Thank you for submitting an Open Public Records request with Camden County. Your request was given the reference number W008460-071416 for tracking purposes.

Our office will forward your request to the appropriate Department for their review and search of their files for the requested records. A written response will be send to you within seven business days or sooner depending on the type of records requested.

Please note that day one of the calculation begins the day after the custodian receives your OPRA request. This calculation applies to the agency's actual business days of operations which are 8:30 a.m. to 4:30 p.m. If the agency is closed for a holiday, this date does not count towards the seven business day deadline. If any request received after the close of a business day will be deemed received on the next business day.

You may monitor the progress of your request at the link below. Additionally, you will receive an email from our office to inform you that your request has been completed and a response is posted at the below link.

Again, thank you for using the Open Public Records Center.

RE: OPRA REQUEST of 7/14/2016, Reference # W008460-071416

Dear Marissa Dreher,

The Camden County Custodian of Records received your Open Public Records Act request on 7/14/2016. To access your request please click [here](#).

The Camden County Health Department and the Office of Environmental Affairs conducted a search of their files and informed my office that there are no responsive documents to your request. As such this letter constitutes completion of your request.

Pursuant to N.J.S.A. 47:1A-1, et seq. if your request for access to a government record has been denied or unfulfilled within the seven (7) business days required by law, you have a right to challenge the decision by the County of Camden to deny access. As provided by law, you have the right to either institute a proceeding in the

Superior Court of New Jersey or file a complaint with the Government Records Council (GRC) by completing their Denial of Access Complaint Form located at the GRC's website at [www.state.nj.us/grc](http://www.state.nj.us/grc). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at P.O. Box 819, Trenton, NJ, 08625, by e-mail at [grc@dca.state.nj.us](mailto:grc@dca.state.nj.us). The GRC can also answer other questions about the law. All questions regarding complaints filed in Superior Court should be directed to the Superior Court.

Should you have any questions, please contact the Custodian of Records at (856) 225-2131.

Sincerely,

*Mike Mevoli for

The New Jersey Department of Environmental Protection has responded to your submitted Open Public Records Act (OPRA) record request. The following information will help you understand the response and your next available actions.

**Tracking #:** This is the Department's assigned Tracking # to your OPRA record request, which should be used in all corresponding matters.

### **Record Request Response:**

- **In Progress** – Based on the nature of the request, the records sought, and/or the manner to which the records may exist, the Department requires additional time to investigate and respond to the request.
- **Filled** – Based on the information provided in your request, the Department was able to investigate and respond to your record request.
- **Denied** – Based on the nature of the request and/or the records sought, the Department has denied your request pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.
- **Partial** – The Department has identified both responsive government records and records being denied based on the nature of the request and/or the records sought, that do not meet the definition of a government record pursuant to a specific exemption(s) cited in N.J.S.A. 47:1A-1 seq.

**Disposition Notes:** Provides detailed information concerning the Department's response to your request.

**Accessing Records:** Dependent on the volume of records and your interest, there are five (5) methods available to access the responsive government records:

- **File Review** – Schedule a file review with the Department to directly access the records and take notes or tag records of interest for copying. Copying can be performed by either the Department's onsite Copying Unit at State duplication fee costs or by the requester employing a Copy Vendor Service. If there are records stored in archives, a five-day processing period will be included prior to scheduling a review.
- **Copy Request** – All records of interest will be copied by the Department's onsite Copying Unit at State duplication fee costs unless a Copy Vendor Service is employed.
- **Electronic Records Request** – Dependent on the size & nature of the e-records, the Department will email the records or provide a CD or DVD.
- **Fax Request** – Based on the number of pages, the Department faxes the responsive records.
- **Web Access** – The responsive records can be accessed directly through the Department's web site. Web address will be provided.

## Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq.)

1. The fees for duplication of a government record are specified below. We will notify you of any special charges, special service charges or other additional charges authorized by State law or regulation before processing your request. Payment shall be made by check or money order payable to the State of New Jersey and mailed to the address specified below.

**Hard Copies:**  
Letter & Legal size = \$0.05 per page  
Oversized Maps (Color) = \$5.00 per map  
Oversized Maps (B&W) = \$3.00 per map

**Electronic Records:** CDs = \$0.55 per CD  
DVDs = \$0.55 per DVD

2. Pursuant to OPRA (C.47:1A-5c & C47:1A-5d), the Department will apply special service charge for any extraordinary expenditure of time and effort to accommodate a request. The special service charge will be based on the actual direct cost of providing the records. The requester shall have the opportunity to review and object to the charge prior to it being incurred; however, in the event the requester objects to the special service charge, the request will be closed and access to the records will not be granted.
3. By law, the Department must notify you that it grants or denies a request for access to government records within seven business days after the custodian of the record requested receives the request, provided that the record is currently available and not in storage. If the record requested is not currently available or is in storage, the custodian will advise you within seven business days when the record can be made available and the estimated cost. You may agree with the custodian to extend the time for making records available, or granting or denying your request.
4. You may be denied access to a government record if your request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.
5. If the Department was unable to comply with your request for access to a government record, the custodian will indicate the reasons for denial on the request form.
6. Except as otherwise provided by law or by agreement with the requester, if the custodian of the record requested fails to respond to you within seven business days of receiving a request form, the failure to respond will be considered a denial of your request.
7. **Resolution of Disputed Findings:**

In the event that a requester does not agree with the Department's record response, the requester should:

**No Records** - Reexamined the request details to evaluate if all of the information was provided that could aid the Department in locating records. The Department's ability to identify records of interest is in direct correlation to matching the Department information with the information provided on the request. Such important identifiers are Facility/Site Name, Address, Case #, Permit #, Block/Lot.

**Denial** - If your request for access to a government record has been denied or unfilled within the time permitted by law, you have a right to challenge the decision by the Department to deny access. The Department denies access to records only when those records do not meet the definition of a government record and/or public access is not allowed pursuant to the law. At your option, you may either:

- a. Contact the Office of Record Access to re-visit the matter or provide further explanation.
- b. Institute a proceeding in the Superior Court of New Jersey
- c. File a complaint in writing with the Government Records Council (GRC). You may contact the GRC by toll-free telephone at 866-850-0511, by mail at PO Box 819, Trenton, NJ, 08625, by e-mail at [grc@dca.state.nj.us](mailto:grc@dca.state.nj.us), or at their web site at [www.state.nj.us/grc](http://www.state.nj.us/grc). The Council can also respond to other questions about the law.

8. Information provided on this form may be subject to disclosure under the Open Public Records Act.

Trenton, N.J. 08602  
609-633-1408

Mr. Peter Masnik  
2 Kings Hwy. West  
Haddonfield NJ 08033

RE: 1800 Davis St., (aka 1800 East)  
Lot 39, Block 1395  
Camden City, Camden County  
#N75294

DEC 30 1987

Dear Mr. Masnik:

This is in response to your letter dated 12/23/87, concerning the applicability of the Environmental Cleanup Responsibility Act (ECRA) to the sale of the above referenced premises. On the basis of the sworn statements set forth in the affidavit signed by Fred DiMarco, the Department finds that this transaction is not subject to the provisions of ECRA.

This decision is made in light of the absence of an industrial establishment as defined within the Standard Industrial Classification numbers covered by the Act. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Environmental Cleanup Responsibility Act (ECRA) to this transaction does not relieve the above referenced of any responsibilities under any other environmental statutes, regulations or permits.

In addition, this determination of ECRA nonapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location.

Should you have any further questions regarding this matter, please contact me at (609) 633-7141.

Sincerely,

  
Michael DeTalvo, Supervisor  
Bureau of ECRA Applicability and  
Compliance

Re: Sale of 1800 Office Buildings (two buildings)  
Camden, New Jersey to Meyer Rooz, et al  
Our File No. 3132

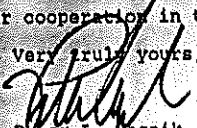

Dear Sirs:

My client is the owner of two neighboring office buildings, both called the 1800 Office Building ("East" and "West"), in Camden, New Jersey, which buildings are under a sales agreement.

I enclose a non-applicability affidavit and certified check for \$100.00 filing fee for each of these two buildings (they are under the same ownership, but have different lot and block numbers and street addresses, so I assumed it was necessary to file separately). I would appreciate your processing these applications for non-applicability letters.

Thank you for your cooperation in the matter.

Very truly yours,

  
Peter L. Masnik

RE: 1800 Davis St.  
Lot 39, Block 1395  
Camden City, Camden County  
#N90793

Dear Mr. Wolf:

This is in response to your application dated 2/22/89, concerning the applicability of the Environmental Cleanup Responsibility Act (ECRA) to the sale of the above referenced premises. On the basis of the sworn statements set forth in your affidavit, the Department finds that this transaction is not subject to the provisions of ECRA.

This decision is made in light of the absence of an industrial establishment as defined within the Standard Industrial Classification numbers covered by the Act. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Environmental Cleanup Responsibility Act (ECRA) to this transaction does not relieve the above referenced of any responsibilities under any other environmental statutes, regulations or permits.

In addition, this determination of ECRA nonapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location.

Should you have any further questions regarding this matter, please contact Charles Salter at (609) 633-7141.

Sincerely,

Dear Mr. Masnik:

This is in response to your letter dated 12/23/87, concerning the applicability of the Environmental Cleanup Responsibility Act (ECRA) to the sale of the above referenced premises. On the basis of the sworn statements set forth in the affidavit signed by Fred DiMarco, the Department finds that this transaction is not subject to the provisions of ECRA.

This decision is made in light of the absence of an industrial establishment as defined within the Standard Industrial Classification numbers covered by the Act. Any inaccuracies in the affidavit or subsequent changes in the facts as stated therein could alter the Department's determination.

The inapplicability of the Environmental Cleanup Responsibility Act (ECRA) to this transaction does not relieve the above referenced of any responsibilities under any other environmental statutes, regulations or permits.

In addition, this determination of ECRA nonapplicability does not constitute any finding by the New Jersey Department of Environmental Protection as to the current site condition or existence or nonexistence of any hazards to the environment at this location.

**Block and Lot Well Search:            0   Wells Found**  
**County/Municipality = Camden - Camden City   Block = 1395   Lot = 39**

| Download Document | Permit Number | Well Name | Well Use | Document | Date (permitted/drilled/sealed) | Physical Address | County | Municipality | Block | Lot | Location M |
|-------------------|---------------|-----------|----------|----------|---------------------------------|------------------|--------|--------------|-------|-----|------------|
|-------------------|---------------|-----------|----------|----------|---------------------------------|------------------|--------|--------------|-------|-----|------------|

This report retrieves all approved/accepted well documents received by the NJDEP that have been electronically data managed. Cancelled permits where no well was drilled are not displayed. Each row displays information for a permit, record, or decommissioning.

**Location Methods**  
 The Location Method column explains how the location of the well was determined. The most common methods are:  
 "Digital Image" - This method is only acceptable for well permits or decommissionings. Locations should be within approximately 200 feet of the actual well location.  
 "GPS" - Global Positioning System. These locations should be accurate.  
 "Prop Loc - Hard Copy" - Located by the well driller using the atlas grid system. These locations specify a point in an atlas grid cell. The well could be located anywhere within that cell.  
 "Survey frm Benchmark" - Locations collected by a licensed surveyor. Locations should be accurate.

**NOTES:**  
 This is NOT a Well Registry Report but a report on Well Permits issued by the Department and reflects the data provided in the well permit, record, and decommissioning at the time of document submission and may not reflect the current information on lot and block, address or construction or ownership of the wells.

Please refer to information available at [http://www.state.nj.us/dep/watersupply/pw\\_permit.html](http://www.state.nj.us/dep/watersupply/pw_permit.html) for more information regarding detailed well searches if this report does not provide the information you need.

**Well Permit numbers.** After Sept 2008 the format of the well permit number was changed to accommodate the submission of online well permitting applications. The letter P (denotes a paper application) and E (denotes an electronic application) followed by the year and a consecutive number. Prior to September 2008 the permit numbers were based in the NJ Atlas Grid system.

Dates displayed indicate the permit approval date for permits, drilling end date for records, or sealed date for decommissionings

Proposed capacity and depth is displayed for permit rows and finished capacity and depth is displayed for record and decommissioning rows.

Please note that if "REDACTED" appears in the report it means that the information is not available over the internet, but can be provided upon written request to the Bureau of Water Systems and Well Permitting.

## Envirofacts Search

### RCRAInfo

The RCRAInfo Search allows you to retrieve selected data from the Resource Conservation and Recovery Act Information (RCRAInfo) database in Envirofacts. Specify a facility using any combination of facility name, geographic location, and facility industrial classification.

### Facility Selection

**Facility Identification:**

**Facility Identification Option Value:**

- Beginning With
  Exact Match
  Containing

### Geography Search

Enter a partial value for any geography option except for the state value. We strongly recommend that you enter a small geographical area to begin the search since Envirofacts contains a large number of facilities.

**ZIP Code:**

**Address:**

- Beginning With
  Exact Match
  Containing

**City:**

**County:**

**State:**

### North American Industry Classification System (NAICS) Data Search

Select a search option from the drop down menu. For the "Equal to" option enter a 4 to 6-digit NAICS code. For "Beginning with" or "Containing" enter up to 6 digits. Enter the NAICS Code or lookup the appropriate NAICS Code by clicking the "Lookup NAICS Code" link.

**NAICS Codes:**

**Re: Owner Questionnaire for Environmental Site Assessment  
Ferry Office Building Property at 1800 Davis Street  
Block 1395, Lot 39  
City of Camden, Camden County, New Jersey  
T&M Project No. CMRA-00010**

Dear Property Owner:

T&M Associates (T&M) has been retained by the Camden Redevelopment Agency (CRA) to conduct an Environmental Site Assessment (ESA) for the site parcel referenced above as part of the pre-acquisition due diligence procedure.

In order to satisfy the site history and owner/operator review and research requirements of the assessment, we request responses and copies of any pertinent documentation and mapping for the following queries associated with the former and historic operations at the site parcel during and prior to your ownership as available.

You may contact me directly at 732.676.1729, or [jmartin@tandmassociates.com](mailto:jmartin@tandmassociates.com), with any questions regarding this request for information and the assessment procedure.

1. Please provide copies of any previous or existing environmental reports, assessments or investigations that may have been completed for the Site in response to spills, discharges or releases of hazardous materials, fuels or wastes.
2. Please provide information regarding any existing or closed/abandoned onsite wastewater collection and disposal systems at the site, including septic tanks, seepage pits or oil/water separators.
3. Please provide information regarding any potable or other production water supply wells at the site.
4. Please provide information regarding all existing, former and abandoned underground storage tanks (USTs) at the site. Please include any NJDEP reporting for the USTs.
5. Please provide information regarding any pending, threatened or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on or from the site.

CMRA-00010

Property at 1800 Davis Street, Camden, NJ

Page 2

6. Please provide information regarding any past, current or proposed remediation/investigation activities that have occurred on the site in response to contaminated soil, groundwater or surface water.
7. Please provide information regarding any reported or unreported recognized environmental conditions or areas of environmental concern at the site.

Thank you for your anticipated cooperation. If you have any questions or require any additional information, please do not hesitate to contact me.

Very truly yours,

**T&M ASSOCIATES**
